

The Planning Study will identify the operational, space, and level of service needs to provide a plan for the orderly and efficient expansion of the existing ticketing hall which is constrained in terms of circulation and waiting space, and which does not include passenger restroom facilities. The Planning Study will evaluate the following major components:

- Moving the existing west wall further west to create additional circulation and waiting area spaces.
- Relocating several tenant and facilities spaces displaced by the westward expansion.
- Constructing new restrooms.

**EXISTING (Baseline for Alternatives)**

Space Program	
Agent Economic Development	71 SF
SAS	141 SF
ABM General Manager	254 SF
TSA PreCheck	80 SF
ABM Dispatch	80 SF
<b>Total AED Baseline</b>	<b>252 SF</b>
Facilities/Building
