MoreRNO: One-of-a-kind Infrastructure Investment for Our Region

The Reno-Tahoe Airport Authority is transforming the travel experience at the Reno-Tahoe International Airport (RNO) with a multi-year infrastructure program, MoreRNO. This construction program—the largest ever at the airport—will bring passengers more of what they love. RNO will have more local restaurants, more shops, more space to park cars, more room to hug loved ones, more art from the thriving Reno arts scene and more architecture inspired by the Reno-Tahoe region. More ways to move you.

As we move into a new era for our beloved airport, we will do our best to maintain the convenience you've come to know and the amenities you love even as we grow. 'Cause we all want more of a good thing and good things are coming soon.

RNO Passenger Tip:

Arrive at least two hours before your flight and use the real-time parking availability feature on our website if you plan to park at the airport.
